

Rebuilding Talent Strategies for a Modern Energy & Utilities Environment

Energy and utility organizations are under pressure to modernize infrastructure, maintain regulatory compliance, and deliver reliable service—while managing large, complex workforce programs and evolving talent demands.

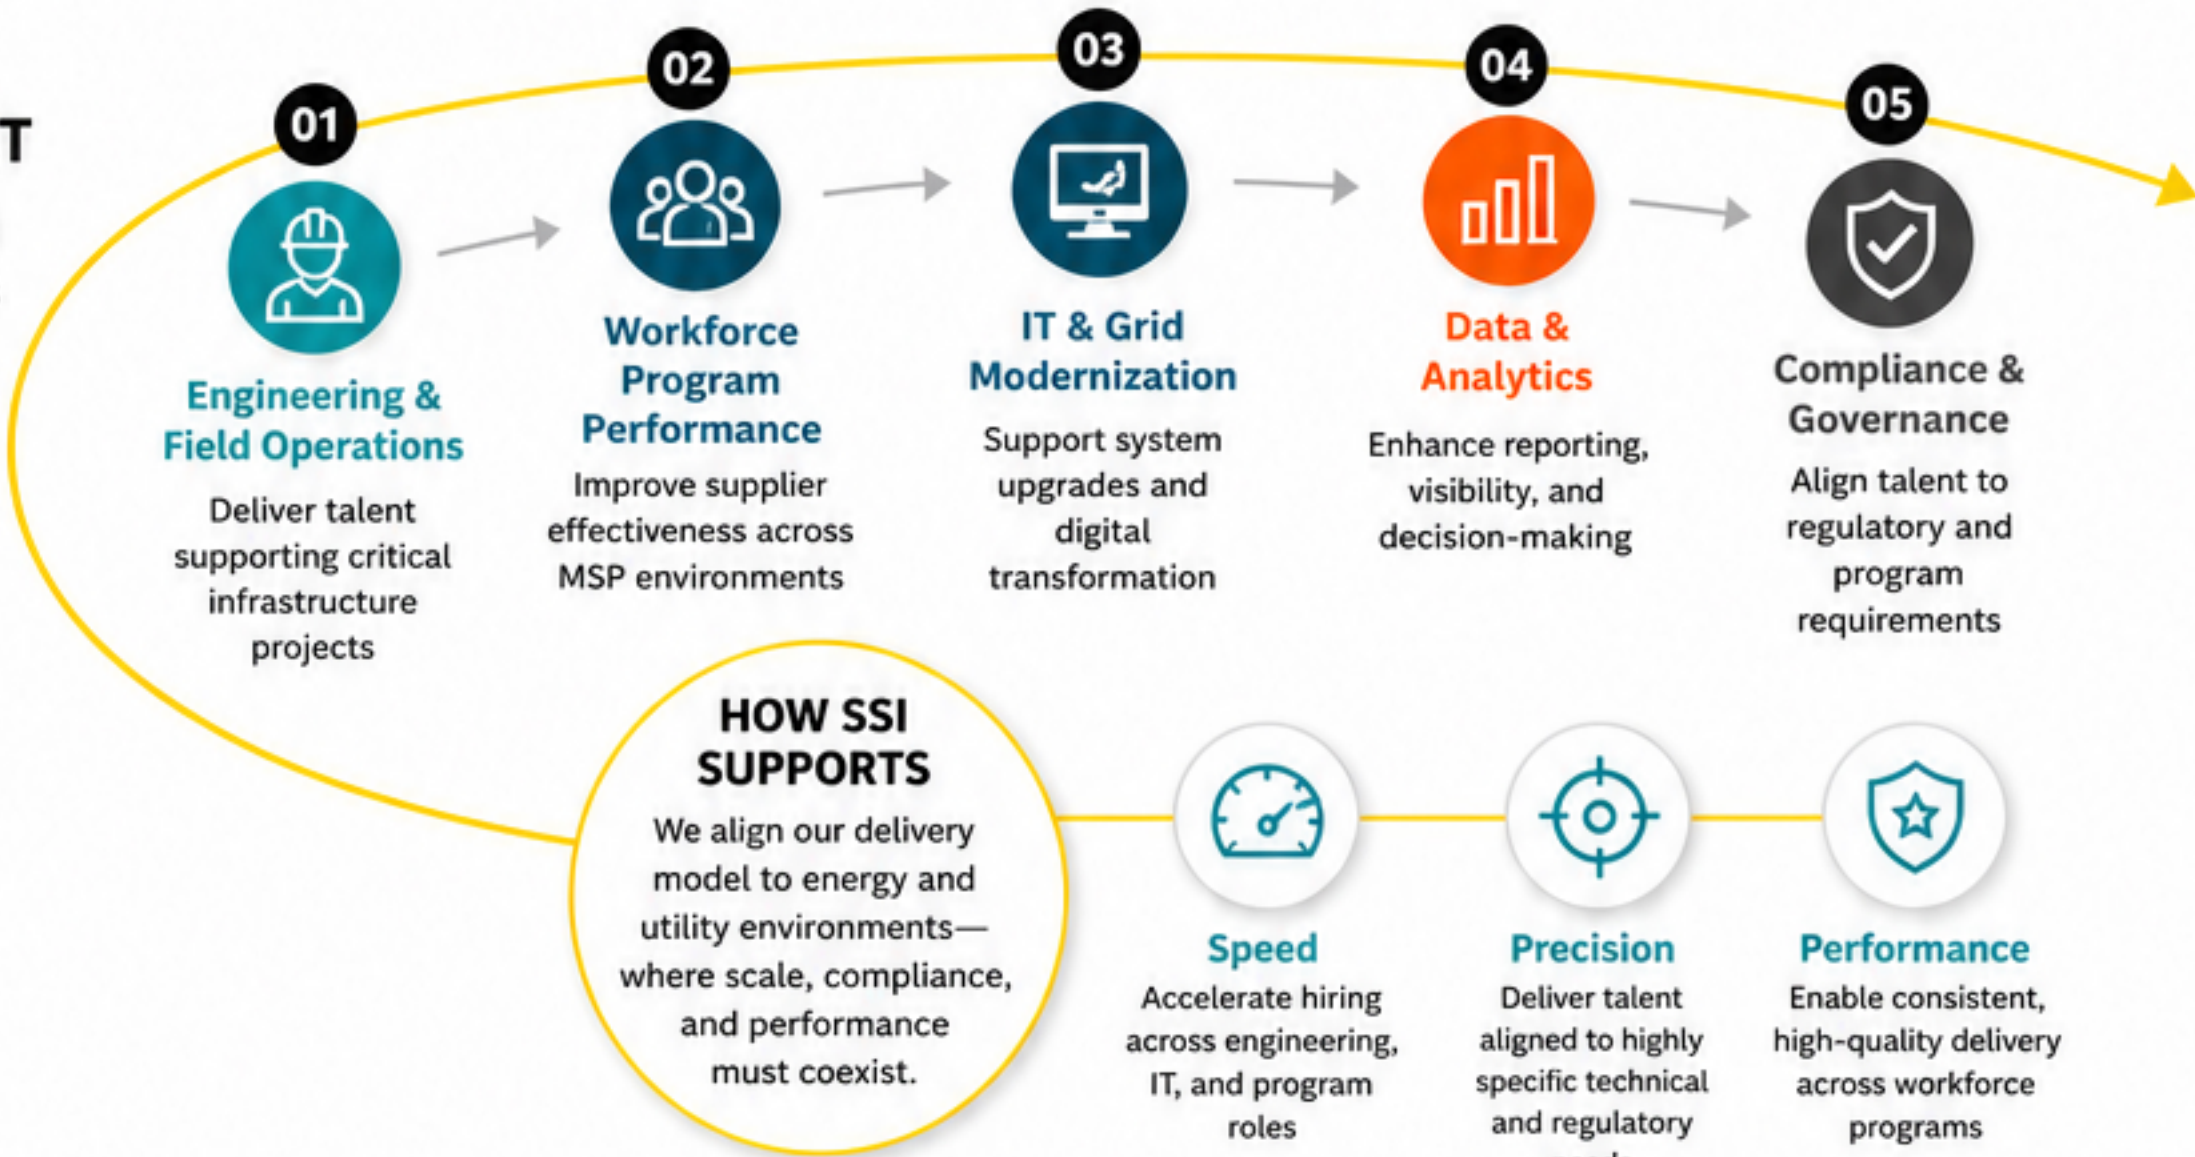

The Reality

Talent is no longer just a support function.
It's a critical driver of reliability, compliance, and large-scale program performance.

WHERE WE DRIVE IMPACT

We help energy and utility organizations deliver on their most critical initiatives through **right talent, now.**

KEY TALENT AREAS

- Electrical & Field Engineers
- IT & Systems Professionals
- Program & Project Managers
- Data & Analytics Professionals
- Environmental & Compliance Specialists

MEASURABLE BUSINESS IMPACT

EXPERIENCE & PROVEN IMPACT

- Delivered talent across engineering, IT, and professional labor categories
- Achieved top supplier rankings within complex MSP programs
- Successfully navigated supplier consolidation initiatives
- Accelerated hiring for infrastructure, IT, and transformation roles
- Maintained high performance across large-scale workforce programs

Example Impact

Supported a major utility organization in improving supplier performance and scaling workforce delivery across multiple labor categories—resulting in faster hiring, improved program efficiency, and stronger stakeholder alignment.
